

Hello Richard,

I understand that this email may be rather unexpected. My name is Sabian Hibbs, and I have worked with your team at the NEC for the Christmas Parties for the past 4 years.

The reason I'm writing to you today because of a conversation I recall yourself and I having before the end of the Christmas season 2017. The convocation was along the lines of myself leaving the company to start my own business, and you seemed to like the idea.

I have an opportunity that will benefit the both of us greatly beyond what was possible.

I currently own a company called "Tessabian Financial Limited" we are based in the Netherlands and Manchester. We are building the most intelligent automatic trading platform on the market, technology so advanced, it matches the complexity of the human brain.

Now I would love to talk to you further about this opportunity, and the many benefits it will open.

The market now is crying out for this sector and we have the right business plan to fill the gap and overtake what little undeveloped services that occupy the same sector.

From a business point of view, there is no limit to the amount this company could grow, the sky really is the limit here.

We are looking for Seed Investments for equity release within the company up to 25 percent.

Will you join us to take the world by storm!

If you have any further questions I would love to hear back from you Richard.

Kind Regards

S.P HIBBS (CEO Tessabian Financial Limited)
